#### **DETAILED ACTION**

This Office Action is in response to the amendment filed 15 December 2005.

# Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1,4-7,9-12,15-18 and 20-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1,4-7,9-12,15-18 and 20-22 disclose a sum of areas of said surface portions of said semiconductor layer receiving incident light being larger than a sum of areas of said plurality of first semiconductor regions and said second semiconductor region. This limitation is considered new matter.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Application/Control Number: 09/813,827

Art Unit: 2822

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1,4-7,9-12,15-18 and 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Prior Art (Fig. 7) in view of Yano (U.S. Patent 6,118,165).

Applicant's Prior Art discloses a light-receiving device (Fig. 7) that contains a ptype semiconductor substrate (81) having a first surface on a light receiving side and a second surface on the opposite side to said first surface, a semiconductor layer (74) formed on the first surface of the substrate and having a plurality of opening, a plurality of island formed p-type first semiconductor regions (76) (protruding portion) formed in the semiconductor layer so as to reach substrate from a surface of the semiconductor layer, where the plurality of first semiconductor regions being formed apart from each other, a p-type lattice formed second semiconductor region (72) selectively formed in a surface region of semiconductor layer with a higher resistance and surrounding each of the semiconductor regions with a surface portion of the semiconductor layer therebetween and a lattice formed first electrode (83) formed on second semiconductor region. Applicant's Prior Art (Fig. 7) discloses all the limitations except for a second electrode formed on the second side. Whereas Yano discloses a light-receiving device (Fig. 4) that contains a photodiode with a substrate (11) with a first side and a second side, an electrode (16a) formed on the second side and an electrode (15) formed on the first side. The electrode is formed on the second side of the photodiode to supply current to the device or keep it at ground level. (Abstract) Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the photodiode by incorporating a second electrode on the second side of the

Application/Control Number: 09/813,827

Art Unit: 2822

substrate to supply current to the device as taught by Yano. In regards to claims 6,11,17 and 22 dealing with a bias, since the devices of the prior art disclose the same structural limitations as the claimed invention that it would have been obvious to one having ordinary skill in the art at the time the invention was made to reverse bias the device which would deplete the regions, in addition it is well known in the art that a voltage will be applied to a device which has an electrode on the top and bottom surface to supply current to the device.

## Response to Arguments

Applicant's arguments with respect to claims 1,4-7,9-12,15-18 and 20-22 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2822

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiesha L. Rose whose telephone number is 571-272-1844. The examiner can normally be reached on M-F 8:30-6:00 off 2nd Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
